Attendance Is 269,976

DESPITE the great falling off in attendance at the last game of the world series yesterday the aggregate total of gate receipts passed the \$900,000 mark—passed it with a little to spare, for the exact total is \$900,233. This figure sets a record for the event for future baseball championships to aim at. It is \$177,819 in excess of the best previous gate collected during the 1919 series between the Cincinnati Reds and Chicago White Sox.

Only 24,510 paid to see the final game between the Giants and the Yankees, but the total attendance figure, 269,976, also establishes a record for the event. The final total of the club owners share is \$472,675.72, but the New York National and New York American League clubs do not retain all of that sum. The rules provide that 50 per cent. of the clubs' share for the first seven games shall be paid into their respective league treasuries, and that in case an eighth game is necessary, as was the case yesterday, then 75 per cent. of the clubs' share of the receipts for that game must go to the league treasuries. This makes the final distribution as follows:

Advisory Coungils... \$135,034.20 Nat. League treasury... \$7,885.38

Advisory Councils..... \$135,034.20 Nat. League treasury... \$7,885.38 97,885.38 97,885.38

Railroads Plan to Reduce Rates Equal to Cut in Wages of Their Employees

BOODLE-WITNESSES VANISH

CHICAGO, Oct. 13 .-- A proposal to meet all future reductions in the wages of railroad employees with corresponding decreases in railroad freight rates is to be presented to the Association of Railway Executives at its meeting here to-morrow, it was announced to-night. The proposition is to be submitted by a special committee of rail-

coad officials which last week conferred with Government officials at

Washington, it was stated by a railroad official. The proposition to pass all future decreases in operating costs along to the public, it was stated, was in line with the policy of the railroads to make freight rate reductions and at the same time allow

their railroads to operate at a profit. The railroads emerged from the war facing a huge deficit, he as serted. The 6 per cent. profit provided for by the transportation act failed to bring any material relief because of the decrease in business, and had the Railroad Labor Board not authorized a reduction of wages effective July 1 many railroads would have been bankrupt before the end of the year, he said.

To effect a reduction of freight rates and at the same time main tain present revenues for the railroads the plan announced to-night was formulated. Increased business, brought about by lower freight rates, is expected to provide the increased revenue necessary for the railroads to operate at a fair profit, it was stated.
